## 1. How to Enter Test Mode

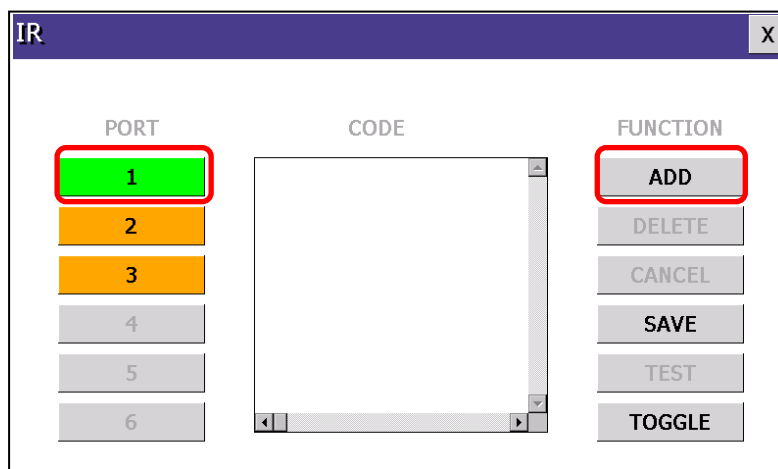

On pressing and hold no. 1 button with something sharp like ball point pen, press no. 2 button for Test Mode.

## 1. Test Mode

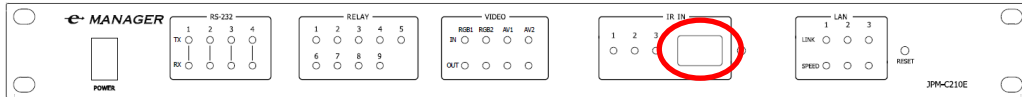

Click IR button

## 2. IR PORT Set up

① Select IR PORT => ② Press ADD button

### 3.Enter Remote Controller Value

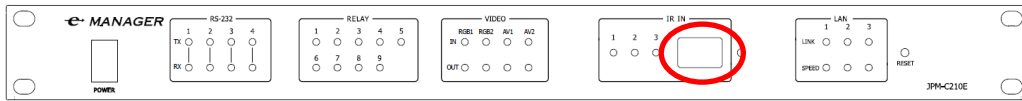

If entering remote controller value into the receiving part(Red Mark), IR value is entered like below.

The screenshot shows the IR configuration window. The 'PORT' column has six buttons, with button 1 highlighted in green. The 'CODE' column has a text field containing the value '0000230C 00001193 00000244 00000210', which is highlighted with a red box. The 'FUNCTION' column has six buttons: ADD, DELETE, CANCEL, SAVE, TEST, and TOGGLE.

If you want to add IR value,

The screenshot shows the IR configuration window. The 'PORT' column has six buttons, all of which are grey. The 'CODE' column has a text field containing the value '0000230C 00001193 00000244 00000210'. The 'FUNCTION' column has six buttons: ADD, DELETE, CANCEL, SAVE, TEST, and TOGGLE. The 'ADD' button is highlighted with a red box.

Press ADD button

Like above, if entering remote controller value into the receiving part(Red Mark), one more IR value is entered like below.

#### 4. Save
